

Working with Brent and his team was relaxed, professional and reliable. We were able to count on Brent and the Team to answer questions and work with us in a flexible way whenever we made changes to our surface. When it was time to install the court and nets, we could not have been more happy with the quality of care that was put into the installation. The Sport Court team knew their product and they installed it quickly and efficiently. Brent's quote was accurate and there were no hidden costs or unexpected fees for our group to pay. Now that the court is in, our community has been drawn to the space! We could not be more thrilled with the end product. Our Sport Court is providing the families in our community with a healthy space to play. This Sport Court surface turned our space into a year round place for people to get together. We are grateful for the service and the product provided and we would recommend working with Brent and his team to anyone who is interested!
