

Our town does not have outdoor pickleball/tennis courts, so our pickleball club was searching for an alternative. Sport Court tiles became the answer.

We purchased 2 courts of Sport Court outdoor tiles and put them into our town's curling rink. Our club members did the installation and before curling starts up again in the winter, we dismantle the courts and store them away for the winter. The tiles come up easily and don't require a lot of storage space.

Providing a safe and comfortable surface for our pickleball players is important to our club. The sport court tiles gives our pickleball facility a professional look and a great surface to play on.

It is very noticeable that there is less body fatigue playing on tiled courts, verses our other two courts we spray-painted onto the cement. The tiles absorb the shock and reduce joint strain. The surface allows you to move easily about on the courts, yet provides enough grip for safety purposes, therefore allowing players to concentrate on the game with less worry of slipping or falling. The tiled courts are a pleasure to play on for all our members, young and old.

The ordering process was made easy through Brent from Sport Court Alberta. We were appreciative of his expertise, information and guidance. I would definitely order through this company again.

Thanks Sports Court Alberta for the opportunity for us to provide this product ensuring quality pickleball courts in our town!

- Rhonda Martin, President of Shellbrook Pickleball Club
