## WHAT IS **Daytona**?

Now that you finally own your dream ride, why not make your garage worthy of its presence? Daytona™ garage flooring by Sport Court® is the perfect surface for your ride to rest on.

Daytona™ is a racer-designed flooring surface that's engineered to protect your sub-floor from chemicals, oil, grease, petroleum, antifreeze or any other liquid flowing around the garage or pit. It's designed to work on any flat surface, indoors or out. Daytona™ is designed to reduce body fatigue that is often associated with hard surfaces.

Daytona™ is available in 12 different colors and can be laid out in grids and patterns to enhance a car's or bike's design. Pit areas to hospitality areas, garages to showrooms, Daytona™ keeps your machines looking better than new.

> Note: Colors are reproduced as closely as possible. They may not represent an exact color match to the flooring.

## Daytona™

12" x 12" x 1/2"  
(30.48cm x 30.48cm x 12.7mm)  
13.73 oz (389 g)

## Installation

Forgive the cliché, but installing Daytona™ is a snap. The primary tools needed: hands and feet. Simply assemble tiles in the same direction—pegs on the left and top, loops on the right and bottom.

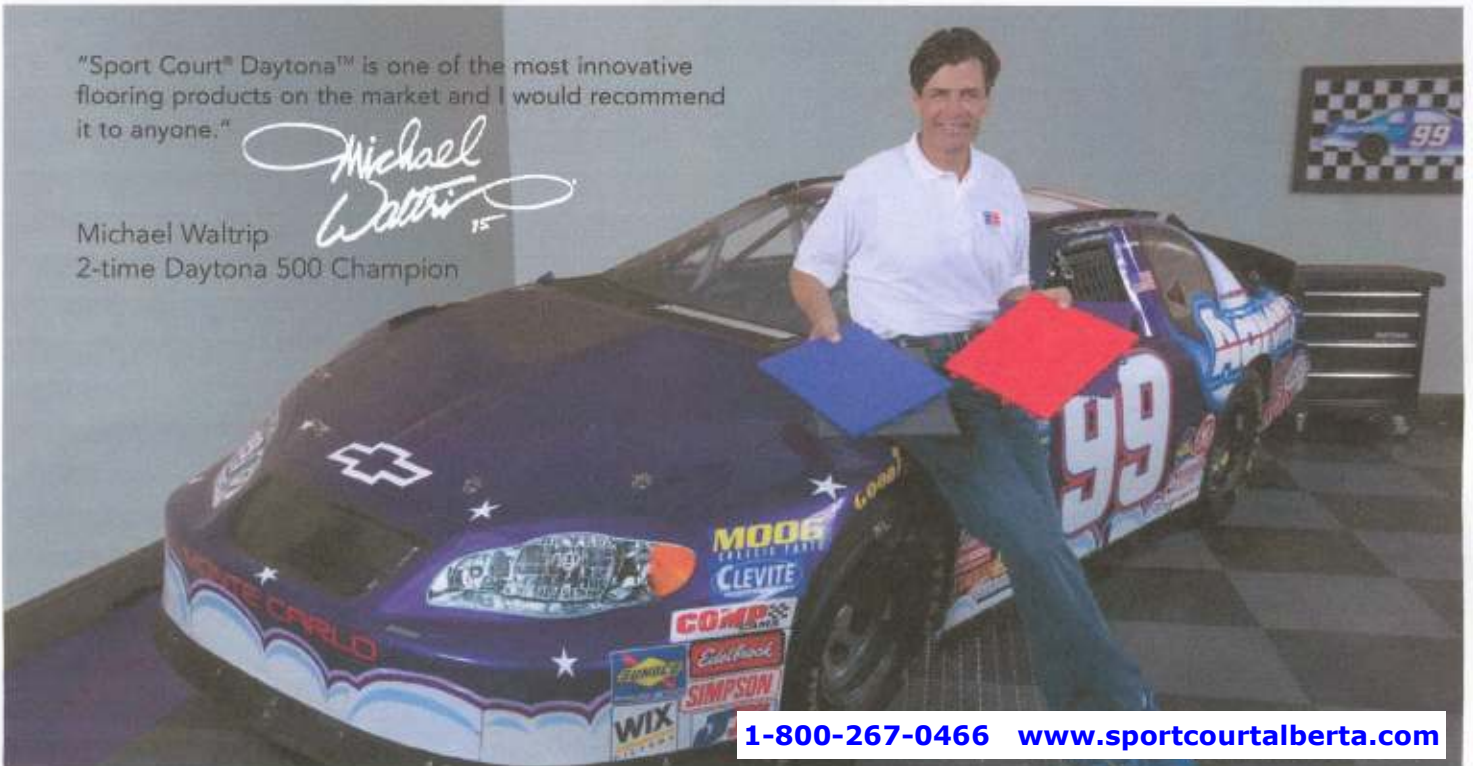

After laying a tile in position, step on its edge to lock the peg into the loop. Custom cutting or trimming, if necessary, can be done with a utility knife. Ramp edges are also easy to install. Then drive onto the surface. Daytona™ comes up as easily as it goes down. In fact, it can be readily disassembled in large pieces using a broom handle, making maintenance, transportation and reassembly easier than a victory lap.

"Sport Court® Daytona™ is one of the most innovative flooring products on the market and I would recommend it to anyone."
